

PowerTradeCopier Last Reviews & Testimonials

- I would like to share my experience about PowerTradeCopier (<http://multiterminal.net>).
- I am a professional forex trader and several years ago, I started managing two accounts for my friends.
- Our initial capital was 18,000 and we have made nearly 100% by the first year.
- My friend has posted statement on forex forum and after long negotiations, we managed to involve five more investors with capital 70,000.
- I use scalping strategy and there are moments when my robot opens 3-4 orders in a matter of seconds.
- I also trade on a news in semi-automatic mode.
- Our investors already had accounts with different brokers and we failed to convince them, to open an account with our brokerage company.
- It was impossible to manage all mt4 accounts simultaneously and for this reason there was a need for account copier, and the most important parameter when choosing a copier was copying speed (latency).
- We tested a number of copyists, but they were almost identical, had copying latency, and were difficult to manage. Learn more...
